

KENTICO ON AZURE

TOTAL COST OF OWNERSHIP ANALYSIS

Our Kentico on Microsoft Azure TCO Analysis provides a financial and value-based estimate intended to help customers determine the direct and indirect costs of moving their on-premises or co-located Kentico Website to a fully Microsoft Azure hosted site. For most Kentico websites no matter the size or customizations in their website, it can be converted to leverage cloud technology. This powerful analysis provides a financial and business goal-oriented illustration of how the cloud can impact the performance and scalability of a website.

Our Kentico Competencies
Microsoft Azure | Online Marketing
Development & Integration | E-commerce

Do you need a TCO Analysis?

It's past time to move your website to the cloud! A Kentico on Azure Total Cost of Ownership Analysis can provide the answers needed to make a wise decision about moving to Microsoft Azure. The Bit-Wizards TCO Analysis is a low risk approach to understanding the cost and benefits of Kentico on Azure. If your business is in any of the following scenarios this engagement is a perfect way to get the information you need to make a sound decision.

- The organization has an existing Kentico website that is either located on-premises or at a co-located facility and desires greater value with the speed and agility the cloud offers.
- The organization has an existing Kentico e-commerce website that requires high-availability and scalability to meet customer needs.
