

Catastrophe Comes
in Many Forms.

IS YOUR BUSINESS PREPARED FOR DISASTER?

Disaster looms in both the physical and digital world. It is hard to identify all the areas your business could be at risk. Ensuring your business can weather a storm, or potential data breach is imperative for the success and ultimately the survival of your company. Typically small and medium-size companies don't plan adequately enough to survive, let-a-lone stay profitable. Find out below how you could be vulnerable.

When Mother Nature Strikes

90% of small companies fail within a year if they don't resume operations within 5 days after a natural disaster.

50% of businesses never reopen after a natural disaster.

When IT Security is Threatened

71% of ransomware attacks targeted at small businesses, with an average ransom demand of \$116k.

50% Annual income affected if a business is disrupted during their busy season.

\$71k
& UP

Average cost of business email fraud attacks.

\$21k
& UP

Average cost per day to resolve a cyber attack.

ARE YOU AT RISK?

PROTECTION FOR WHEN S#!T HITS THE FAN

You don't have to worry about your business' vulnerabilities. You can have peace of mind. Our Managed IT Service is designed specifically for small and medium-size businesses that need real IT support, but can't afford the overhead and workforce that it takes to do it right. No one can predict the future (or the weather apparently), but we can ensure that we will be right here to help you get right back to business if a disaster occurs.
